Forecast for Sunday 25 Jun 2023

Weather: Clear skies across much of Snowdonia to start, especially in eastern parts. Cloud building across western slopes through the morning with rain arriving from the west by the afternoon. Rain is likely to be heavy, persisting for several hours, turning locally thundery and accompanied by strong winds and gales across higher routes. The band of rain will clear by mid-afternoon to give a widely fine evening, however the odd shower is still probable, mainly across western ranges.

Chance of cloud-free hill tops above 800m: 90%, lowering through the morning to 20% in the west and 40% in the est. Improving from the west to above 80% by late-afternoon.

Low Cloud and visibility: Extensive cloud is expected to build from the west by late morning, with bases lowering to around 400-600m in association with the rain band. Bases likely to be lower across western hills, possibly below 400m. Visibility beneath cloud will be generally good, but becoming poor or locally very poor in heavy rain and moderate in late showers. Bases lifting through the afternoon to be well above summits.

Meteorologist's View

Gusts of 40-50mph will affect higher routes and exposed ridges throughout the morning and early afternoon to give difficult walking conditions and a risk of being blown off balance. Strong sunshine possible at times in clear spells.

Forecast for Monday 26 Jun 2023

Weather: Any patchy low cloud across western summits soon clearing to give a morning of sunny spells and a few well scattered showers, particularly in the north. Cloud will thicken from the west, turning late sunshine increasingly hazy. Chance of some patchy light rain or drizzle across western slopes towards midnight. Feeling cooler.

Maximum wind: Southwest 20mph gusting 25-35mph.

Chance of cloud-free hill tops above 800m: 40% in the west initially and by late-evening. 80% or higher elsewhere.

Low Cloud and visibility: Low cloud is likely to affect higher routes in the morning, especially towards the north and west coasts bases of around 700m. Cloud lifting clear of summits by the afternoon, but is expected to lower again from the west during the evening to around 600-800m. Visibility will be good or very good, perhaps moderate in any showers.

Temperature: **Valleys:** Plus 13 Celsius rising to Plus 17 Celsius.
At 800m: Plus 6 Celsius rising to Plus 9 Celsius.
Freezing level: Well above summits.

Thursday	Bright with sunny intervals. Chance of some well scattered showers, these may turn locally heavy. Moderate to fresh westerly winds.
